

Crystal Park

TREE of LIFE & GROWTH

The Crystal Park art project has officially been approved by the residents!

Sponsored by ArtsinStark and JP Morgan Chase Foundation, CBP has worked with residents from Crystal Park and local professional artist, Kevin Anderson of Anderson Creative to develop a public art piece to be placed on a resident maintained vacant lot on 15th Street NE between Superior and Edwards Ave. Based on input from residents, Mr. Anderson created a tree structure which will be made out of aluminum tiles engraved by residents representing Life and Growth in the community. Hanging from the branches will be aluminum pieces representing people from the neighborhood who have passed away. The projected completion date is July 1 with a start date the first week in June.

To leverage the placement of the tree on 15th Street a Block Project is underway focusing on exterior renovations along the street which will include a porch furniture swap program, street clean-up, painted fencing, some new sidewalks, decorative shepherd's hooks along the street, as well as a pick your neighbor program for a home for sale by owner.
